The easiest way to go “instant DR”

For both conventional and mobile digital X-ray systems, the small and light-weight DX-D 45 Digital Detector offers general radiography facilities all the advantages of Direct Digital, while maximizing the use of their existing equipment.

The high resolution DX-D 45 can be combined DX-D 40 detector and is therefore ideal for use in pediatric environment, for extremities and for special examinations.

The Automatic Exposure Detection (AED) means no electrical connection to the X-ray system is required, for seamless use with virtually all X-ray systems. The convenient dimensions of the DX-D 45 make it an ideal solution for imaging of premature infants. With its 10x12 inch image size, it can fit into an incubator bucky tray.

Wireless technology enhances operator comfort, and improves exam flexibility and convenience, even in challenging imaging situations.

Faster and more efficient workflow

The DX-D 45 is an integral part of an Agfa Instant DR solution, which includes the NX image acquisition software with MUSICA processing and detector. These cassette-less and filmless solutions provide a range of workflow benefits that improve productivity and speed up exam time. Retakes can be made faster without changing cassette, and the number of images is no longer limited by the availability of cassettes. To complete the workflow, images can be sent faster to a PACS or imager in DICOM format.

• The easiest and most versatile way to go Direct Digital
• High resolution, light-weight and small cassette-sized detector offers optimal convenience and portability and ideal for use in pediatrics, for extremities and special examinations
• Automatic Exposure Detection (AED) allows seamless use with virtually all X-ray systems, maximizing the use of the existing X-ray equipment
• Improved workflow and examination speed
• Excellent connectivity with DICOM compatible software and imagers
• MUSICA processing for excellent contrast detail and exam-independent, consistent image quality
• Choice of Cesium Iodide (CsI) or Gadolinium Oxy-Sulphide (GOS) detector scintillator

The DX-D 45 Digital Detector with Automatic Exposure Detection (AED) offers a fast and effective way for radiography facilities to benefit from high quality digital imaging using virtually any x-ray equipment.
MUSICA and DR image quality: improved diagnostic confidence

The DX-D 45 is compatible with our ‘gold standard’ MUSICA image processing, which has been specially adapted and tuned to further enhance the excellent DR image quality. Exam-independent, it delivers consistent image quality and high contrast detail. Combining MUSICA with the high quality of the DX-D 45, in terms of both sensitivity and sharpness, provides improved diagnostic confidence and efficiency.
